

FIBURI ROADMAP

ROADMAP 1.0

Fiburi is a project with great aspirations. We want to form part of this great NFT Universe and be able to contribute this great community. The base of the project fundamentally revolves around art and anime. Creating a strong connection in the community between our members and a large family. Every Fiburi NFT will not only be a unique handmade collectible, but will also try to serve a future purpose in the metaverse. This is our ROADMAP 1.0 where we will have a series of goals which we will be updating as the project takes its course. We want to be realistic with our goals so that we are able to meet every single one of our objectives and not make the community any false promises. As mentioned before, we have great aspirations like being part of a future metaverse, create our own brand and potentially create our own game where every member will play a fundamental roll in our own world of the Fiburi.
